

# CANOSSA HIGH SCHOOL

## ANDHERI (E)

We are in a era, where in our mental health & psychosocial concept is disturbed. We are living in a Covid I9 Pandemic nightmare. Just now when we look around, the hits are on, no strict Lock down but we are forcefully quarantined in our homes. A modern tradgedy of covid I9, experience is very tragic.

Yet, we are called to go beyond and make it a place worth living in.

Hence we need to have healthy mindset that can connect us globally.

Today our Reflections lead us to a big question... "where this Covid I9 Pandemic is leading us to"

Anxiety is increased, fear has created confusion....at the same, realisation has come to us....That so much of bitterness had, divided our world, of late & the now moment invites us to be one family. ....So Parents Education is a difficult challenge yet possible.

So let's get connected with each other, by becoming lovers of technology. A unique way indeed to help and enhance our potential with Online Education process.

Our current challenges can have solution for time being...and therefore we are here today for this meet....

To my experience online teaching apps are more flexible than our routine and rigid ways We can

- schedule our Time Table,
- one can become self discipline and also responsible...
- We have more choices than otherwise.
- It comes very handy and convenient....
- it has plenty of variety, good creativity, sharing, Audios, videos
- above all it will increase our interest and technological skills.

Why am I saying this....bcoz we have no other alternative than going for online process....In course of time. ....all of us will get adjusted....

Of course when we weigh it's pros n cons....we shall see....all our students find more comfort in virtual learning....develop their skills....it comes to their door post. ....one can see individual attention and attraction...this process requires place n equipment. ....good managerial skill....

Bur at a time it can quarantine students. ..they will learn to be aloof...they will become more independent and sometimes play the fool.... enjoy more freedom. ....they will know more than we can handle.

So, it's a call for Parents to be more responsible towards their child.

Dear Parents, you need to monitor them when they are Online, you need to trust them but make them responsible too.

Dear Students, you are big enough to know what is good and bad. You will take your own responsibility during the online classes as well in home learning.

Though far from home, we will try to do our best in whichever way we can in giving our best to the students.

Stay home, Stay safe.

I assure you all our prayers for your families.

May God Bless us all.

May our Foundress St Magdalene shower her Blessings on each of us.
